Payment Calculator

CareCredit works like a credit card, but is exclusive for healthcare services. With no up-front costs, no pre-payment penalties, and no annual fees, CareCredit lets you pay over time and frees up cash and credit cards for the other things you want or need. CareCredit offers low monthly payment plans for healthcare procedures not commonly covered by insurance, including dental treatment. Plus, you can use your card again and again to pay for additional

treatment for yourself or family members in any CareCredit practice.

Insurance

As a service to our patients, our practice accepts most dental insurance programs. Our accounting staff will prepare all the necessary forms for your dental benefits. Our staff will gladly submit a pre-treatment estimate to your insurance company so that you will know what your benefits will be.

USUAL CUSTOMARY AND REASONABLE

We are committed to providing excellent dental treatment to all of our patients based on their individual needs. Our fees reflect our commitment to the quality of care our patients deserve. We have found our fees to be usual and customary for dental practices in the immediate area, regardless of any insurance company's determination. Our practice refuses to allow insurance companies to dictate patient care of treatment.

INSURANCE

Whether you have dental insurance coverage or not, the patient is always responsible for the full amount of charges. For established patients with dental insurance, only your estimated patient portion is excepted at the time of service. Dental insurance is intended to cover a portion of your dental treatment charges. The amount of coverage depends on the individual contract your employer or union has with the insurance carrier. This coverage is dependent on many factors including deductibles and maximum allowable benefits given a year. As a courtesy to our patients, we will bill you insurance company.
